

# Gallop ahead with India Opportunity Portfolio

July 2018

# Why India

- The Government of India has taken significant initiatives to strengthen the economic credentials of the country, to make it one of the strongest economies in the world.
- Indian companies are gaining a stronger foothold internationally and expanding their international presence by investing overseas.
- The country continues to urbanise at a strong pace driven by a combination of up trending consumption, robust job creation and growing financial penetration.

India is one of best performing EM currency in 2017

Improving Fiscal Deficit (% of GDP)

■ Fiscal deficit

Lower CAD over the Years (% of GDP)

■ Current account balance

# India stands out among Real GDP Growth

Real GDP Growth  
(% y/y)

- Emerging Markets continue to remain attractive on Real GDP growth differentials
- India stands out on the Emerging Markets pack on the back of strong fundamentals

Source : IMF, World Economic outlook (April 2017)

# India Long Term Growth Trend

- Every 10 years, from FY1957 to FY2016, we see an upward shift in India's CAGR
- 10 Year average GDP growth has gone from 3.56 to 7.72
- We are now set to enter the next decade of a lift in growth

# Why India – Markets may deliver double digit Earnings Growth

In the long run, the markets always follow the earning pattern. For Nifty, FY17-20E the EPS growth stands at 17% CAGR, which shows the potential upside for the markets growth for 3 year period. This compliments the current market valuations (P/E & P/B) which are at par with their historical averages.

Source: Motilal Oswal Securities, MOAMC Internal Analysis | Data as on 31<sup>st</sup> March 2016

CAGR - is an investing specific term for the geometric progression ratio that provides a constant rate of return over the time period; Std Dev - a quantity expressing by how much the members of a group differ from the mean value for the group.

The information provided herein is for illustrative purpose only and should not be construed as an investment advice.; Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments; Mar-95 is taken as base year

- ▶ Over long periods of time equities do deliver in line with corporate earnings; but it's a known fact that the volatility in share prices is way higher than volatility of earnings themselves.
- ▶ This volatility in share prices results in emotional response of greed in rising markets and fear in falling markets. Mostly these responses are way more exaggerated on upside as well as downside.
- ▶ When evaluated in hindsight after the data plays out; one usually rues that responses were disproportionate to changes in corporate earnings.

| <i>Avg Return</i>              | 2%    | 0%   | 1%   |     |          |       |

- ❖ During 2011-16, 67 companies crossed over from Mini to Mid category, generating an average return CAGR of 39%, v/s 5% for the Sensex.
- ❖ During 2011-16, 26 companies crossed over from Mid to Mega. The Mid-to-Mega portfolio delivered average return CAGR of 31% over 2011-16 v/s 5% for Sensex.

Source: Focused Investing – 21<sup>st</sup> Wealth Creation Study by Raamdeo Agrawal

- ☞ Motilal Oswal Group possesses legacy in equities for over 3 decades.
- ☞ Motilal Oswal AMC is chaired by Mr. Raamdeo Agrawal, one of the most honored and trusted names in the investing world.
- ☞ One of the pioneers of PMS business with over 15 years of PMS track record.
- ☞ Trusted by over 38,719 HNI investors and with over Rs. 15,448 Crs of AUM as on 30<sup>th</sup> June 2018.
- ☞ Presence across the length and breadth of India.

## Basic Traits of our Investing Style

- ☞ We invest in companies with operating leverage than financial leverage.
- ☞ We do not believe in “timing the market”, rather we believe in “spending time in market”.
- ☞ We do not over diversify.
- ☞ The businesses we invest in, must have growth potential with economic moat.
- ☞ We practise long-term Buy and Hold investing style.

# Our investment philosophy – ‘Buy Right : Sit Tight’

At Motilal Oswal Asset Management Company (MOAMC), our investment philosophy is centered on 'Buy Right: Sit Tight' principle.

## Buy Right

- **‘Q’uality** denotes quality of the business and management
- **‘G’rowth** denotes growth in earnings and sustained RoE
- **‘L’ongevity** denotes longevity of the competitive advantage or economic moat of the business
- **‘P’rice** denotes our approach of buying a good business for a fair price rather than buying a fair business for a good price

## Sit Tight

- **Buy and Hold:** We are strictly buy and hold investors and believe that picking the right business needs skill and holding onto these businesses to enable our investors to benefit from the entire growth cycle needs even more skill.
- **Focus:** Our portfolios are high conviction portfolios with 25 to 30 stocks being our ideal number. We believe in adequate diversification but over-diversification results in diluting returns for our investors and adding market risk

# Why 'Buy Right : Sit Tight' is significant?

Real wealth is created by riding out bulk of the growth curve of quality companies and not by trading in and out in response to buy, sell and hold recommendations.

This philosophy enables investor and manager alike to keep focus on the businesses they are holding rather than get distracted by movements in share prices.

An approach of buying high quality stocks and holding them for a long term wealth creation motive, results in drastic reduction of costs for the end investor.

While **BUY RIGHT** is largely the role of the portfolio manager, **SIT TIGHT** calls for involvement from the portfolio manager as well as investor. This brings in greater accountability from the manager and at the same time calls for better involvement and understanding from investor resulting in better education for the latter.

Long term multiplication of wealth is obtained only by holding on to the winners and deserting the losers.

# Strategy objective, Risk-Return matrix & construct

The Strategy aims to generate long term capital appreciation by creating a focused portfolio of high growth stocks having the potential to grow more than the nominal GDP for next 5-7 years across and which are available at reasonable market prices.

## Strategy construct

### Investment Horizon

- Long Term (3 Years +)

### For Whom

- Investors who like to invest with a Long-term wealth creation view

### No. of Stocks

- Around 20 stocks for a portfolio

### Scrip Allocation

- Not more than 10% in a single stock when at the time of initiation

### Sector Allocation Limit

- 35% in a sector

### Strategy Aim

- It aims to deliver superior returns by participating in India Investment and consumption Growth Story

### Strategy Focus

- Focus is on identifying well run companies that are existing/potential leaders in the field of operations

# Model Holding

## Sector Allocations

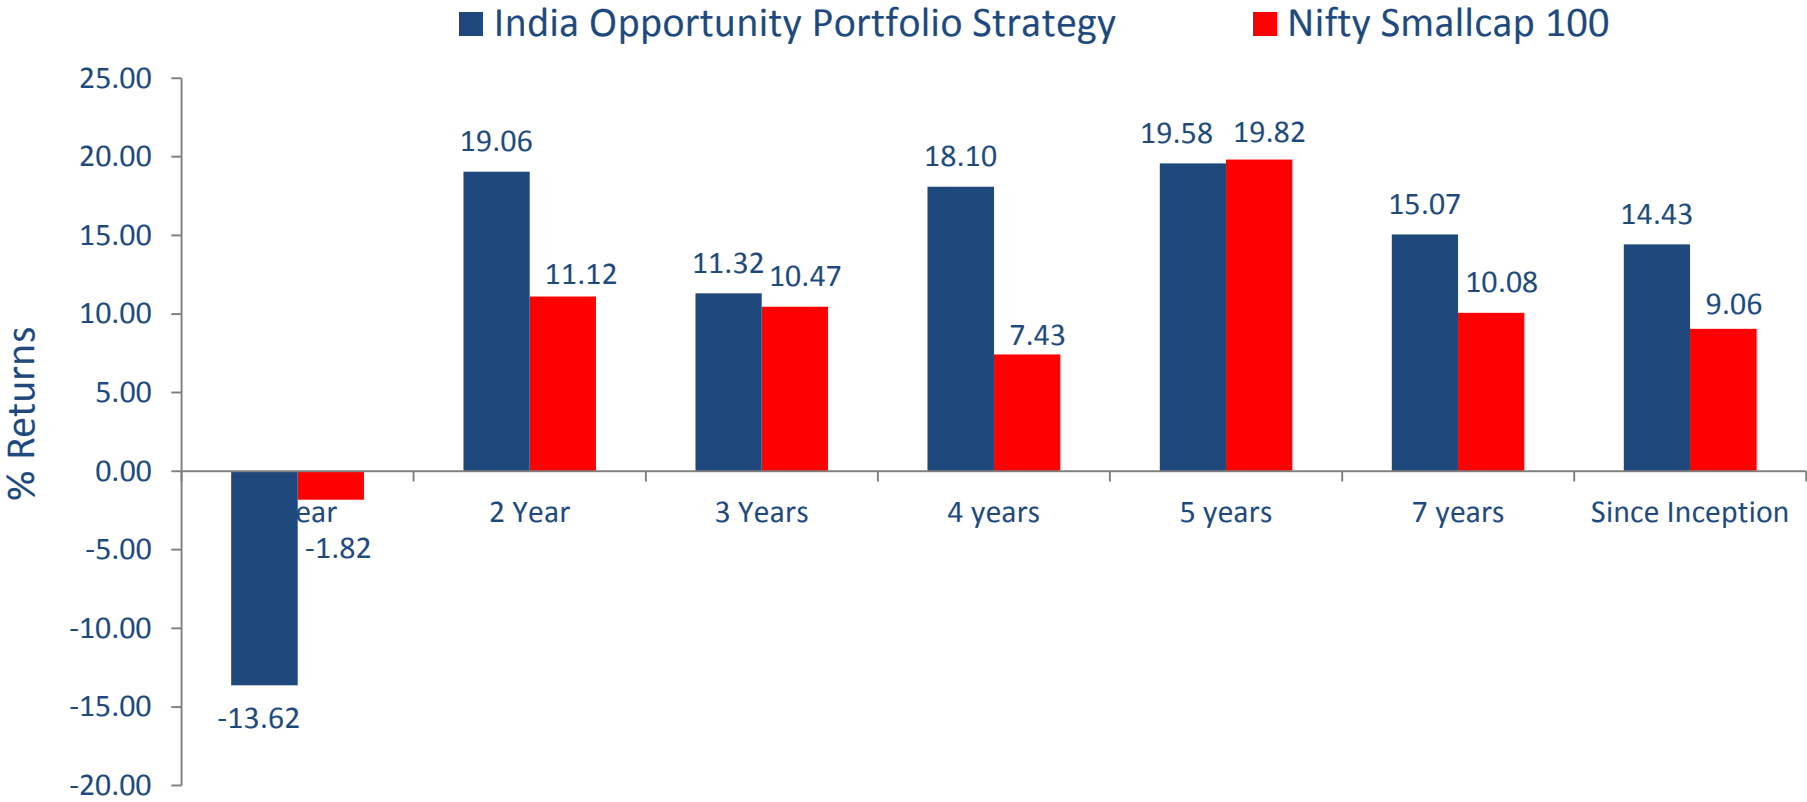

## Top 10 Holdings

| Script Names                | % Holdings |
|-----------------------------|------------|
| Development Credit Bank Ltd | 9.59       |
| AU Small Finance Bank       | 8.06       |
| Birla Corporation Ltd.      | 7.83       |
| Aegis Logistics Ltd         | 6.64       |
| Qess Corp Ltd               | 6.5        |
| Gabriel India Limited       | 5.75       |
| TTK Prestig                 | 5.03       |
| Mahanagar Gas Ltd           | 4.97       |
| Alkem Laboratories Ltd      | 4.93       |
| Canfin Homes Ltd            | 4.45       |

Please Note: These stocks are a part of the existing India Opportunity Portfolio Strategy as on 30<sup>th</sup> June 2018. These stocks may or may not be bought for new clients. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. The strategy may or may not have any future holdings in these stocks. The companies mentioned above are only for the purpose of explaining the concept and should not be construed as recommendations from MOAMC.

# Performance snapshot

Since inception, India Opportunity Portfolio Strategy has delivered a CAGR of 14.43% returns vs. Nifty Smallcap 100 Index returns of 9.06% delivering an alpha of 5.37%

\*Strategy Inception Date: 15/2/2010.

Please Note: The Above strategy returns are of a Model Client as on 30<sup>th</sup> June 2018. Returns of individual clients may differ depending on time of entry in the Strategy. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. Returns below 1 year are absolute and above 1 year are annualized. Strategy returns shown above are post fees & expenses.

# Performance since inception

The chart below illustrates Rs. 1 crore invested in India Opportunity Portfolio Strategy in February 2010 is worth Rs. 3.09 cr as on 30<sup>th</sup> June 2018. For the same period Rs. 1 crore invested in Nifty Smallcap 100 Index is now worth Rs. 2.07 cr.

Strategy Inception Date: 11/2/2010

Please Note: The Above strategy returns are of a Model Client as on 30<sup>th</sup> June 2018. Returns of individual clients may differ depending on time of entry in the Strategy. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. Returns below 1 year are absolute and above 1 year are annualized. Strategy returns shown above are post fees & expenses.

# Rolling Return Performance

- The data shows rolling returns of the IOP Strategy over various time frames.
- It is worth noting that on 1 year rolling basis, the returns are in a very wide range. The best return made by the Strategy is 86% and the worst return is -27%.
- As we increase the time horizon, the outcomes narrow significantly from the average.
- For instance, if we consider the 5 year time frame, historically the best return (CAGR) is 27%, least return is 7% and average return is 16%.
- It may also be noteworthy that the negative returns above 3 years rolling periods are zero

Minimum to maximum returns for a respective time period (in %)

Please Note: The Above strategy returns are of a Model Client as on 30<sup>th</sup> June 2018. Returns of individual clients may differ depending on time of entry in the strategy. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. Strategy returns shown above are post fees & expenses. Returns above 1 year are annualized.

The India Opportunity Portfolio Strategy has outperformed the benchmark with a lower level of volatility and has managed to deliver strong returns while offering defensive characteristics, reducing losses during periods of market downturn but participating in the upside.

| 5 Years Data       | Portfolio | Benchmark* |
